Education

University of Delhi

Master of Operational Research CGPA: 7.2/10

Expected June 2026

University of Delhi

B.Sc. Mathematical Sciences (CGPA: 8.818/10)

June 2024

Jawahar Navodaya Vidyalaya, Samastipur (CBSE)

Intermediate (89.4%)

August 2021

Jawahar Navodaya Vidyalaya, Samastipur (CBSE)

Matriculation (94.8%)

July 2019

Key Coursework

Statistics: Descriptive Statistics, Probability Theory, Statistical Inference, Econometrics

Computer Science: Data Structures, DBMS, Software Engineering, Python Programming

Optimization & OR: Linear Programming, Convex & Discrete Optimization, Nonlinear Programming, Scheduling Techniques, Queueing Theory

Management: Inventory Management, Supply Chain Management, Marketing management, Healthcare Management

Internship/Work Experience

Ministry of Statistics and Programme Implementation (MOSPI)

May 2025-Nov-2025

Intern

- Supported National Biodiversity Accounting & reporting aligning with SEEA framework.
- Extracted, processed and analysed large-scale IUCN spatial datasets using QGIS.
- Reviewed UN and international biodiversity frameworks and aligned them with national reporting standards.

Chegg India

Feb 2023 – Feb 2024

Subject Matter Expert (Statistics & Probability)

- Delivered step-by-step solutions and enhanced my concepts.
- Maintained high academic standards with timely, original, and well-structured responses.

Projects

Student Performance Prediction | NumPy, Pandas, Matplotlib, Sklearn

- Performed exploratory data analysis, visualised key metrics, and identified important feature correlations.
- Applied feature engineering techniques to select and retain high-impact predictors.
- Developed a high-accuracy regression-based predictive model.

Credit Card Approval Prediction | NumPy, pandas, sklearn, matplotlib, seaborn

- Analysed credit application data to identify customer credit behaviour and risk patterns.
- Engineered and transformed risk variables; applied data encoding to enhance model quality.
- Improved credit risk prediction using Logistic Regression, Decision Trees, and Random Forest with Grid Search hyperparameter tuning.

Certifications

Supervised Machine Learning: Regression and Classification

Coursera

Python for Machine Learning & Data Science Masterclass

Udemy

Optimization with Python: Solve Operations Research Problems

Udemy

Technical Skills

Programming: Python, SQL

Data Analysis & Visualization: MS Excel, Power BI, Pandas, NumPy, Matplotlib, Seaborn

Machine Learning & Modeling: Scikit-learn (Regression, Classification)
